THERE can be no doubting either the sincerity or the seriousness of the warning which the Hon. Cedric Blaker, in his capacity as Chairman of the Hongkong and Shanghai Banking Corporation, uttered yesterday when he told shareholders that substantial relaxation restrictions does not come soon, the trade lost with China may never be re-

This is a sombre assessment, but it is based on hard and logical reasoning. It demands the respectful consideration not only of Her Majesty's government but also of Britain's friends.

is madness to throw away for all time the China market for the sake of an embargo which no longer serves a useful purpose. And we assert this, not because of any narrowminded, parochial, preoccupation with the future prosperity of Hongkong, but because the existing trading restrictions are no their design.

The first intention of the Washington from his world tour. UN embargo was to deny Communist China, which entered the Korean conflict, war materials and potential. Subsequently the more ardent protagonists for the retention of the restrictions have seen in them the means of denying China her requirements for industrialisation.

But what, in fact has happened? To quote -the Hon. Cedric Blaker: "The whole (China) picture reveals remarkable speed of development. There special concentration on heavy industries with extensive Russian help. Railway and road communications are being opened up at an astonishing pace.

. It is idle to suppose China is not able to obtain goods shipped from the West to Russia. Instances have in fact occurred where China has exported to Hongkong goods which are not permitted to be sent; into China under the embargo."

In the light of these revelations it is no wonder the Chinese government can decide how to avoid frustration afford to dismiss proposals of British businessmen and the Soviet Union. industrialists. And to sneer at the UN embargo. For China, but the countries to a Washington disputch in the which imposed it.

### STRONGER ROLE

Diplomatic observers said that since President Eisenhower was involved in the consultations now going on at was likely that a thorough and perhaps dramatic reappraisal of the present machinery for dealing with the Palestine problem was under way.

Many diplomats believe the role of the United Nations in the area needed considerable strengthening to deal effectively with the dangerous situation.

Britain and the United States are agreed that they should be prepared for "action" to put teeth into the 1950 tripartite declaration guaranteeing present borders of Palestine from change by force.—Reuter.

"Trial" is an adult picture that shows only too clearly how easily led well-meaning people can be.

They are the victims of a clever manipulator of circumstances, who uses the events leading up to the trial of a young Mexican boy for attempted rape and murder to further the ends of the Communist

In effect, although he is not the star of the picture, the whole action pivots on him, and when he addresses a fundraising rally, using all the tricks of a revivalist meeting leader to rouse them to a pitch of frenzy, his performance puts him in the front rank of the actorn of today.

The player is Arthur Kennedy. Oh yes, he's the villain of the piece, but what a subtle one. In fact, if one presupposes that belief in a cause, however misplaced, is a virtue in itself, he becomes a dangerously plausible villain.

As the pace of the film is fast enough to be interesting, even if the plot is revealed beforehand, it can do no harm to give a slight idea of what it's all about,

At his trial a bewildered Mexican boy is fighting for his life. His lawyer has never tried a case in court before, and his lawyer's partner, although unnilstakably elever, is too smooth a talker and too practised an orator in front of the crowds who are supposed to be putting up the money for a "Save Angel Chavez" appeal to be trustworthy.

His supposed crime is that he forced his attentions on a girl at a beach party, and because she screamed he killed her. When the searchlights were turned on to the beach she was found dead and he had no story. His defence is simple: an innocence of mind that would not have been capable of even imagining that with which he is charged.

### An Excellent Performance

There is far more) to the case however than the mere question of whether or not the boy will die. Glerin Ford as the young inexperienced lawyer has been, removed from a teaching post at University because possesses no practical experience of his subject—law. Douglas

to his problem. Kennedy has been asked to lefend the Chavez boy, but is obviously far too busy with his political deals. Glenn Ford is the misty eyed dreamer who believes in the innocence of the youth. He will do his best, in conjunction with Kennedy of course, to get the boy off, but if he fails, great political capital can be made of the "racial

prejudice" point of view, There is an excellent performance from the negro judge adequate one Hernandez—En from Dorothy Maguire who is prepared to change from Kennedy to Glenn Ford, and Ford himself, while not soaring to any heights greater than he his reached in previous pictures, gains sympathy by appearing to believe sincerely

in the part he is playing.

Katy Jurado is disappointing.

Her accent has deteriorated to the point of becoming barely intelligible, which, while keeping up the character of a simple Mexican, woman, does not help the dialogue.

But this is Arthur Kennedy's picture, and although he has been on the screen for many years in supporting roles, they have not been as frequent as his performances have merited and it would be a very good thing to see him more often.

New York: Salvador Dali said he plans to costume an entire ballet in white rhinocero's horns as a "gorgeous parade of chasity," heralding the wedding of Grace Kelly and Prince Rainier.

The ballet is to be created for performance at the Monte Carlo Opera House in the gala week before the April 18 wedding. Its backers said the idea came from Rainier's mother, Princess Antoinette. The rhinoceros' horn moulf, however, came solely from the surrealistic artist who once inclined to the melting watch tace. Doli now feels that "Ithinocerosism will catch the soul out of time."

"The horn of the white thinoceros is the successor to the horn of the unicorn and islike its ancestor in the Middle Ages—the symbol of chasity," the mustachioed Dali sald.

WHAT D'YOU KNOW!

It is an amusing thought that European women spend vast sums of money every year on having their hair made to curl, while negro women pay to have theirs straightened!

There are three types of human hair—Caucasian or European, Negro and Mongol. All are constructed differently. Looked at in section, the hair from a negro's head is a flat ellipse; and the flatter the hair, the more it curls. That's why white women flatten their hair in curling-tongs or curling-pins. European hair is more oval in shape, while Mongol hair is completely circular and is, therefore, stiff and lank.

AVERAGE CROP

FUIERE are something like 100,000 hairs on the average human head, and each hair is about one-400th of an inch in diameter. Baldness is caused by decay of the hair follicles—the tiny cells in the skin, out of which the hair grows. Pigment granules in the skin decide the colour of hair and when the granules are affected by age, illness or even fright, the hair turns grey or white.

The silvery lustre of white hair is further increased by air bubbles which collect between the cells in the hair. These reflect the light, just as they do in a snow-flake,

Scientists are not certain why hair can turn grey overnight, but they do know why your hair stands on end when you are scared. Fright causes the brain to send a message along your nerves to little muscles which normally keep your hair lying down. These muscles contract and pull up the hair.

### TREMENDOUS STRENGTH

A NOTHER interesting fact about hair is its tremendous A strength. Four average hairs can support a pound weight. from them, they should be left in bygone days, Eastern monarchs ordered ropes made of hair. THERE is a more spiritual significance attached to the history I of the tuft of hair grown by some male Moslems in Morocco and elsewhere. The angels would have a job transporting some of the Kaffir women of South Africa. They form their hair from grease into a series of spikes sticking out all round.

Most of the native women of Africa take more trouble over their hair than do white women. They even grow a kind of built-in hat by placing a grass ring over the crown of the head, and fasten their hair to it. As the hair grows, the ring is raised from the head like a cap. (COPYRIGHT)

What must be remembered is the foresight required today. The layman often assumes that a plane is in the air a few months after being designed.

He has no conception of the time spent in testing different aspects of the plane at all stages. For instance, the Skyrocket was well under way when Bridgeman was just learning to fly. Before supersonic flight, designers knew how a plane would behave at all speeds and in all conditions.

Now, we are advancing deeper into unknown regions. Aircraft are becoming more and more complicated and that in itself means further delays planning and manufacture,

# DECLINE OF THE LONDON PUB

By HARRY WALKER

TOOM threatens the London "local." Whether that is If true or merely a passing phase, sociologists are taking a serious view, as though the way of life of a certain section of the community was changing-and not for the better. Even the licensing courts have expressed anxiety.

What the courts have discovered is that more and more publicans of the small local houses cannot make a living among the beer-taps, and are having to supplement their small takings by seeking other jobs and leaving their wives and daughters to cope as best they can. They are even keen to give up their heences altogether.

TV AND TAX

Television naturally is the ready explanation of dwindling ittendances. Certainly on nights when boxing is being televised the absence of regulars is noticeable even in public houses which lay on television for customers-an installation which is never quite successful, for it seldom happens that all the customers want to look-in and hold their tongues.

Few publicans give television the major blame. They fall back on their old enemy-the high taxation of beer.

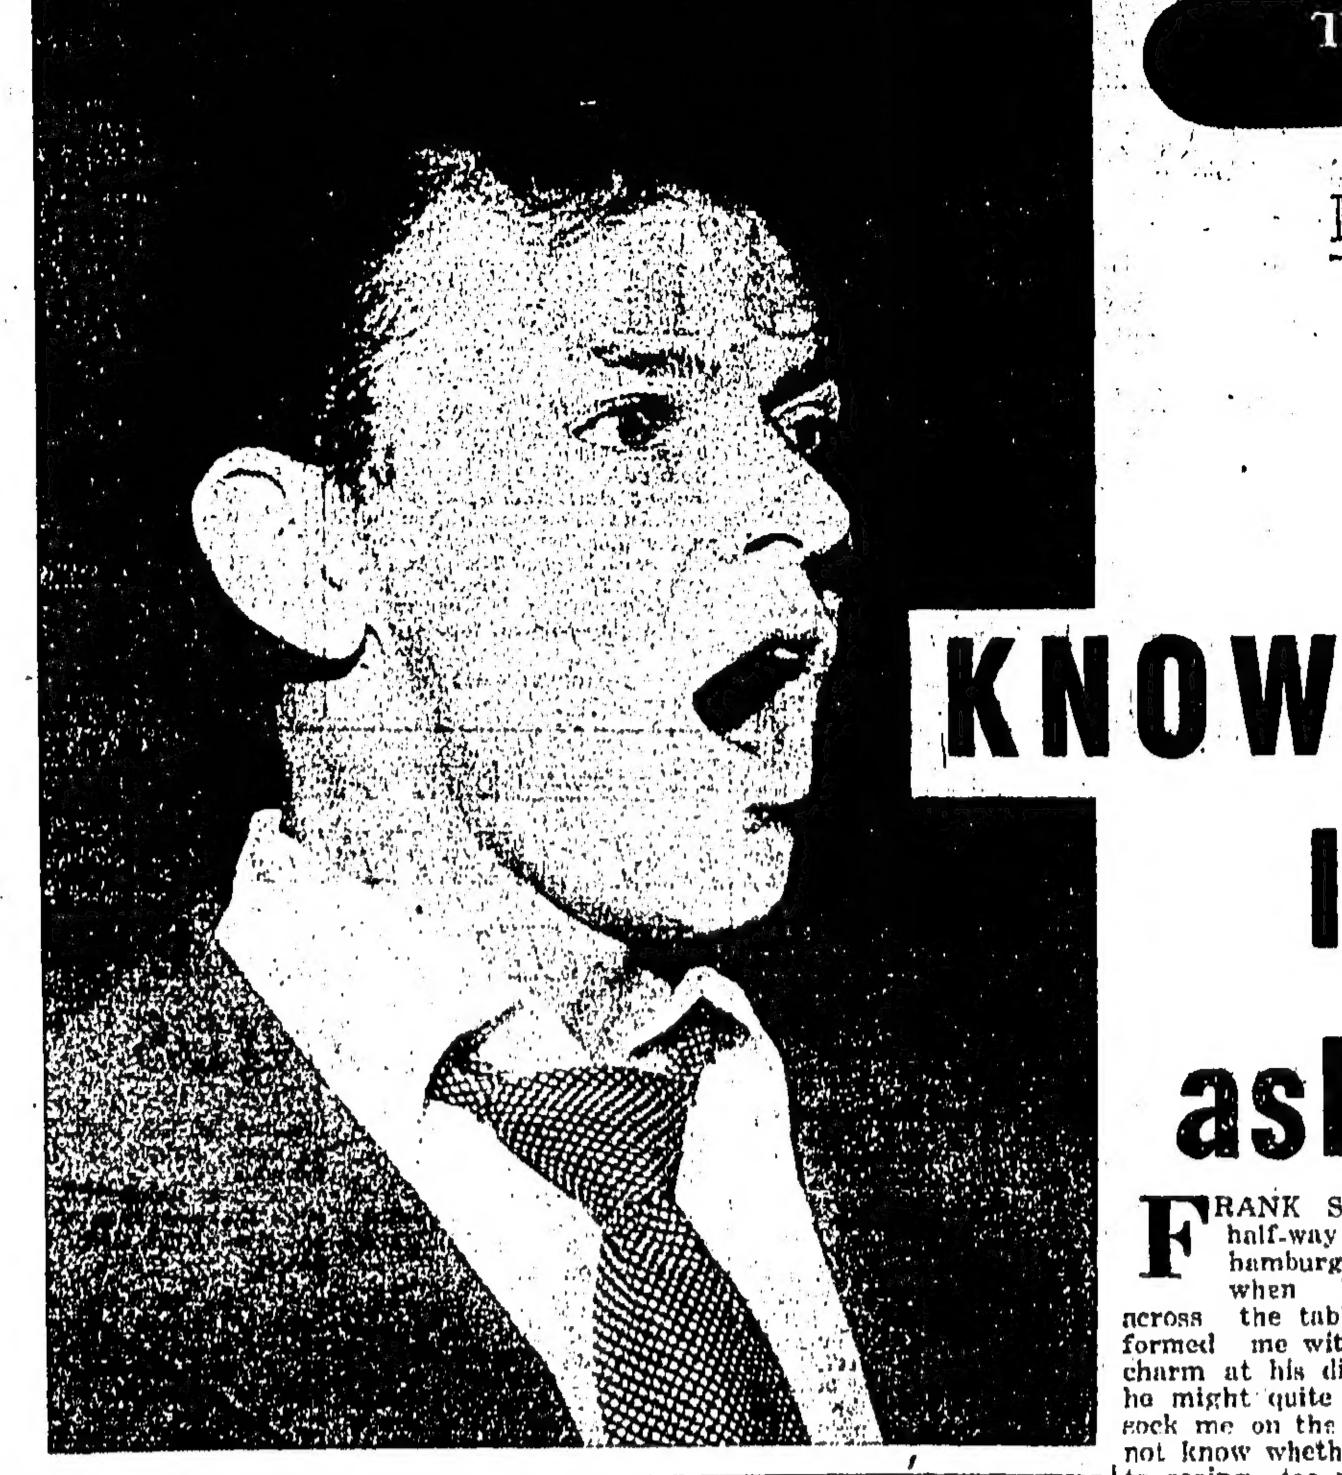

The quality of beer used to be the barometer of the popularity of the typical London "local," and beer was the natural accompaniment of the neighbourly meetings round the tables in the public" bar, where working men and their wives foregathered. A plot of bitter would easily outlast the best of three games on the durtboard or at shove-ha'penny or cribbage. No harm was done. Intexteation was regarded as a seaudal except perhaps

on a bank holiday. Thus while there was profit on beer, the landlord regarded his "public" customers as his friends, and called them all by their first names and knew all their offspring by their names too. His "saloon" bar customers he probably called sir or madam, served them, and left it at that. For the more elegant saloon bar, where the drinks cost more, is that section of a "pub" traditionally frequented by the more aloof middle-class Londoners.

TRANSFERRED ATTENTION The Lendon publicans long ago, and with the best intentions, agreed among themselves that their friends-the working menshould still have their pint at a price they could pay. They would forgo their profits on beer and leave them to the Chancellor of the Exchequer and the browers. True, the price to the consumer went up, but not in proportion to the tax and costs, That was all very well, but the publican has now to try to

publican charges for a fourth, which means that he gets thirty nips out of a bottle instead of twenty and adds £1 to his profit. The drankers of "shorts" are now his cultivated friends, and the regulars in the "public" are drifting to less desirable haunts, feeling a sense of neglect and a loss of fellowship. The atmosphere has changed or is changing, and not for the better; in fact, even a teototaller would say it was deplorable,

# Take It With A Pinch Of Salt...

AM THE GIRL who loves news in fashion, who would rather buy next year's line than last year's, who adores Paris and is not

scared by change.

I AM THE GIRL who, this season, says: "Take it with a very big pinch of salt. It is not a good season in Parix."

The higher walst is the news, and a raised waistline is one thing. But an Empire fancy dress is quite another pigeon, and many of the afternoon and evening dress; are just that evening dresses are just that. The chief interest they arouse is speculation as to whether the wearer is pregnant. (One

CAREERS

Women move up WN Paris I met one of the top career women in France, Francoise Giroud, joint editor

of the Mendes-France paper, L'Express. I had lunch with Francoise Giroud and asked her some more serious questions about

life in France. SHE TOLD ME that she expects to see many women reach the top of their professions in

10 years' time. There are only a few as yet, because it is only since the war that women have taken up medicine, journalism, the law. Burprisingly there are fewer women working now in proportion to men than there

were 50 years ago.

But then, all the working women were in mental jobs. Now the balance has shifted, and women are bursting into the professions—with success.

SHE TOLD ME that she is no feminist. "It was necessary, but it's old-suchioned now." She wears model clothes, goes to many that nights and parties, loves fashion and food.

SHE TOLD ME that, although the Collections show nothing but alarmingly luxurious clothes, the real uniform of Paris, is a shirt and skirt.

# -Feature Programme

The wonderful work being done at Hay Ling Chau is perhaps not as widely known as it should be, and on Thursday evening, at half past nine, listeners can hear a picture in sound and story of life in the Colony's Leprosarium,

Aileen Dekker, who presents the programme, will be heard interviewing some of the patients, and talking to the staff who are helping them on their road to recovery in the beautiful setting of the Island of Hay Ling Chau — "The Island of Happy Healing".

The match for the Calcutta Cup is always the big event of the sports season in Edinburgh, and if Scotland are playing as well now as they were in January, even mighty Murrayfield will be hard put to it to house the tens of thousands who will want to be there. This evening at 11.40 a commentary on the second half of the International match between Scotland and England will be rebroadcast from the BBC for listeners in Hongkong.

### "MUSIC MAGAZINE"

The seventeenth edition of "Music Magazine" tomorrow morning will be the last in the present series. Since the programme's inception in November last year, producer Peter Sharp has presented 49 different items, mainly contributed by musicians and music lovers in the Colony. Visitors on the programme have included Benjamin Bristen, j Maurice Clare.

In the final edition, Dr Ride will talk about Haydn's "Creution", and Maurice Clare gives an introduction to Bela Bartok. This talk was recorded last January by Maurice Clare, as a tribute to one of the greatest of Twentieth Century composers. "Music Magazine" has been so very well received it is hoped that Peter Sharp will agree to produce another series of these programmes next year.

# MANNERS

Says I. M. MacTAVISH

Some months ago I started this column with the statement that there was no excuse for bad manners. The Hongkong football sphere seems to get more than its fair share of provocative incidents and untoward happenings but, even with a full realisation of these facts, I reiterate my previous comment "In football, as in every other walk of life, there is absolutely no justification for downright bad manners".

A week or two ago a sports writer for whom I have considerable admiration was sent to cover one of the week-end games in the Senior League. He also had to cover another assignment but, in order to do full justice to the soccer match, he made a special effort to arrive at the ground in good time for the kick-off.

This was no simple case of a misunderstanding. Both the reporter and the official spoke in pected. goard clear English and, to put in no doubt at all about the undesirability of his presence, It is felt that this thoughtless

netion by the official must have embarrassed his own players as much as it did the reporter. This is borne out by the fact that one of the players came out of the dressing room and quietly obtained and passed on to the I press representative the information he wanted.

In this case the report of the match duly appeared in print but with a less experienced reporter, or one prone to quick temper, the game would almost rertainly have been discarded as no an assignment.

" . . . indeed there is no excuse for had manners . . . .

I hope that those people who queried my comments last Saturday, about there being no necessity for the linesmen at a Senior League game to be Class One referees, took note of what happened in the RAF-CAA game at Boundary Street. # ARMY SOUTH PLAY NAVY TODAY-VICTORY MAY THE CHAMPIONSHIP

By "PAK LO"

A win for Army South today will practically assure them of the top spot in the Hexangular Tournament for even if their nearest rivals, the Club, also win they will still be behind them on aggregate, and since Army South have three games still outstanding after today's game, they are almost certain to add more points to their already impressive total.

The other danger to Army South are their compatriots, Army North, who are at present only one Hexangular point behind them. But even a win today for Army North will not do the trick, for though they have an outstanding game it is against Army South, and the latter are likely to win,

# Final Stages Of Senior Division Pennant Race Resume Today

'TIME OUT"

With the departure of the visiting Ching Hsui Girls' softball team to Taiwan today, softball activities at King's Park this week go back into the same humdrum routine as the final stages of the Senior Division Pennant races come back into the limelight.

Taking top billing in this weekend's four-game card is the Senior "A" clash between the youthful Blackhawks and the once-mighty South China contingent at 11.00 a.m. tomorrow. With the Senior "A" flag already out of their reach, the Hawks' main goal tomorrow will be to maintain their post at the half-way mark of the slippery pennant ladder.

League Delawares and Hurri- sily. cames take on the Comets and the Hongkong University re- vides the fourth and last game pectively. With the Senior 'B" trophy safely lucked away in their hip pockets. Charlie Remedios' hard-hitting Delawares round off their finalgames in this season's fixtures with a clash against the Comets at 2.00 p.m. tomorrow. On behalf of the players and followers of this wonderful sport, here's wishing Joey all the best in everything to come and a very preasant trip. NOT THEIR BEST

With their main factor out of the line-up, the Hawks' defence tomorrow will not be their best and the team's hopes will rest on the shoulders of Rennie Barretto to hoist the mound flag, Catching duties will be in the capable mitts of 'Cuchic' Sousa while the infield quartet finds | couthpaw Eric Remedios at first, Tony Silva at second and Mice Guan at the hot-corner. Injuries have not hit Manchester United but they have chopped and changed with 24 players so far and seem certain to win the First Division Championship, Only other club to call on more men are Huddersfield Town - and they are fighting relegation! Manchester's policy is to "blood" their young reserves. Centre-half Mark Jones is the only ever-present.

### IT'S ALL BRITISH

TAOR years now the London Palladium has been home from home for a line-up of American disc stars; a line-up as long as all my batons put together. But look what happens now.

On March 19 it is an all-British record star bill: Among others there will be Winifred Atwell, Alma Cogan, Petula Clark, the Stargazers, Kenny Baker, Jack Jackson, and David Whitneld.

And Whitfield has another big hit on the way. Listen to hlm singing "My September Love" on Decen.

This song is the latest effor from the master of melody Tolchard Evans. Tolch also wrote David's last big song. "Everywhere."

My guess is that history is about to repeat itself, and that Messrs. Whitfield and Evans are going to have a busy time counting their record royalties.

### GIMMICKY SENSATION

MY look - into - the - future corner: Here are two records to watch for with songs that will go to the top. First: Julius Ln Rosa will be the new teenbgers' delight with his version of "Lipstick and Candy and Rubbersole Shoes."

### OHN CLARKE'S CASEBOOK

THE tilt of her chin and vestiges about her of a former jauntiness suggested that Maud once had enjoyed life to the full, and that its funny side had not been lost on her.

But the way that the colour has drained from her face, and her eyes have sunk into her head, her wrists and legs become spindle-thin, suggest life has not used her too well. And the fur cont she wore at Bow Street, that made you think of neglected ginger cuts, heightened the effect she presented of abject misery.

Yet the evening before, Maud had been cheerful after a fashion. At least on the top of a bus bound for Victoria she to herself at times, occassionally hold free elections in Algeria, into a raucous crescentio.

"I'd come from Paddington, and I was going to Epsom by the Green Line, why should I go for a lady what's going to Streatham?"

The magistrate thought over the logic for a moment, "Well you behaved in a most extraordinary manner," he said, "I'm going to lot you see a doctor." He remanded Moud in custody, and she went off.
